PROFESSIONAL SUMMARY

BCA student (graduating 2027) with practical experience in Excel, SQL, Power BI, and Python, developed through coursework and independent projects. Skilled at cleaning messy datasets, writing SQL queries, and building dashboards that turn raw numbers into insights decision-makers can act on. Seeking an entry-level Data Analyst or Business Analyst role to apply these skills and grow within a data-driven team.

SKILLS

Technical: MS Excel (Pivot Tables, VLOOKUP, INDEX-MATCH, Charts), SQL (Joins, Aggregations, Subqueries, GROUP BY), Power BI (Dashboards, DAX basics), Python, Data Cleaning, DBMS

Analytical: Data Analysis, Data Visualization, Dashboard Creation, Analytical Thinking, Data Handling

Soft Skills: Problem Solving, Communication, Attention to Detail, Time Management

PROJECTS

QuickBites — Restaurant Sales Data Analysis | SQL

- Wrote SQL queries to clean and analyze restaurant sales data, covering orders, revenue, and customer purchase patterns.
- Used JOINS, GROUP BY, and aggregate functions to surface trends such as top-selling items, revenue by category, and order volume over time.
- Translated query results into business-relevant insights to support decisions on menu and sales strategy.

Repository: https://github.com/Anandmohan2006/SQL_projects

Sales Data Analysis | Python (Pandas, Matplotlib, Seaborn)

- Cleaned and processed a sales dataset of 500+ records using pandas — handled missing values, removed duplicates, and standardized formatting.
- Used pandas groupby and aggregation to analyze sales performance across 4 regions and product categories.
- Built visualizations with Matplotlib and Seaborn to show monthly revenue trends and top-performing categories.

Repository: https://github.com/Anandmohan2006/Data-analyst-projects/tree/main/Sales_Data_Analysis

Jarvis — Voice Assistant | Python

- Built a Python-based voice assistant that takes speech input and responds to commands (e.g. opening apps, searching the web, answering basic queries).
- Implemented speech recognition and text-to-speech to handle real-time voice interaction.

Repository: https://github.com/Anandmohan2006/jarvis_project

Student Database Management | SQL

- Built a relational database schema to hold student records — personal details, marks, attendance — from scratch.
- Wrote SELECT, JOIN, GROUP BY, and WHERE queries to pull and filter data for different reporting needs.

EDUCATION

Bachelor of Computer Application (BCA)

St Andrews Institute of Technology and Management, Gurugram | Expected Graduation: 2027

CERTIFICATIONS

- Microsoft Excel: Beginners to Advance — Skill Course
- Data Analytics (30-Hour Training) — Kreativan Technologies
